

Double Coaxial Shower System

THERMOSTATIC | PRESSURE BALANCE | VOLUME CONTROL

The double coaxial valve allows to preset **TWO DIFFERENT WATER TEMPERATURES** on the same shower system in order to please up to **TWO USERS SIMULTANEOUSLY**.

- Two users simultaneously: handshower and body jets to X temperature for user 1; shower head and the second handshower to Y temperature for user 2.
- A single user: preset the body jets to the desired temperature and preset the shower head to a higher temperature. Obtain the same one and only temperature on your skin
- Fully enjoy the thermostatic pressure balance shower advantages.
